MEMO: Support for Windows 7 is ending

Microsoft is set to **end** extended **support for Windows 7** on January 14, 2020, putting a halt on the free bug fixes and security patches for the operating system.

What does this mean?

- No more security updates for Windows 7
- Software companies will no longer support Windows 7
- New hardware may not work with Windows 7

Do you have questions?

- Can I upgrade my existing PC to Windows 10?
- What happens if I continue to use Windows 7?
- Can Windows 7 still be activated after January 14, 2020?
- Will Internet Explorer still be supported on Windows 7?
- Can I get a free upgrade to Windows 10?
- Does this also apply to Windows Embedded 7?
- Are there alternatives that give me extra time to complete my migration while keeping my users safe?

Call Right Click Solutions for the answers.

Support ends January 14, 2020
